

Thanks to IMASCO the Advantages of Acrylic Stucco Really STAND OUT

» For the last decade Imasco has provided the products to achieve an acrylic texture that adds the same character to your building as cement stucco, yet with all the acrylic advantages: countless colours, shade consistency, mold and mildew resistance, water repellence, easy maintenance and longevity.

» Even better, Imasco designed its textured acrylics to be used right out of the pail—just add colour and water. There was always a breadth of acrylic stuccos to choose from. Thanks to Imasco, now there's a depth too.
