

IMASCO CEMENT STUCCO FINISHES

Medium Sandfloat (16/20)

Fine Sandfloat (20/30)

Smooth Finish (Smoothcoat)

Smooth and Sand Floats

Imasco Cement Stucco Finish is a mixture of portland cement (conforming to ASTM C150), hydrated lime (conforming to ASTM C206), inert aggregates, and additives specially blended to provide improved workability, better coverage, colour consistency, and increased water resistance. Specially formulated for a variety of attractive textures and building styles.

Finishes

Imasco Cement Stucco Finish comes in various aggregate combinations that allow design flexibility and a variety of finish appearances;

- 16/20: Used to create traditional texture, sand finish, or machine dash finish.
20/30: Used to create a fine texture or sand finish.
Smoothcoat: Used to create a uniform smooth or Santa Barbara / Mission finish.

Imasco Cement Stucco Finish is available as a Base 100 (white) and Base 200 (grey) for use with Imasco Colors. For best results recommended crack resistance surface preparation over the brown coat.

Features & Benefits:

1. Beauty / Appearance
2. Durability
3. Vapour Transmission
4. Fire Resistance
5. Impact resistant
6. Insect resistant
7. Lasting, uniform color that resists fading or discoloration; UV resistant
8. Earthquake resistance (seismically beneficial)
9. Climate / Moisture Protection

Suitability

- Various substrates
- Various types of construction

Uses

- New Construction
- Over existing stucco

Warranty

All Imasco products qualify for a 5 Year Warranty.
